

EPCOS Product Brief 2016

Power Factor Correction

PhaseCap Energy Series B25674, B25675

The PhaseCap Energy series of power capacitors for power factor correction (PFC), represents a new generation of the PhaseCap series and offers a whole bunch of enhancements and advantages for PFC applications.

The series are available in the versions:

- B25674 - gas impregnated
- B25675 - with filling of biodegradable soft resin

The product range covers voltages from 230 to 690 V AC and outputs from 5 to 33 kvar.

Major enhancements of the new series from EPCOS are:

- Long useful life expectation compared to other series up to 200 000 hours
- Increased inrush current capability by 25 percent and up to $500 \cdot I_R$
- High long term stability, which is up to 150 percent better than other series

Keep key legacy of PhaseCap series:

- MKK technology
- 3-phase overpressure disconnecter
- Discharge module
- Wave cut & heavy edge

PQS

PhaseCap Energy Series

Features and benefits	
Construction	
Winding	Stacked
Technology	MKK, polypropylene film
Wave cut	Special film cutting method to ensure lower contact losses and higher inrush current capability than straight cut types.
Design	Smaller dimensions compared to other series allow higher packing density in the application.
Housing/mounting	Cylindrical aluminum can with stud for fast and easy installation. Mounting position upright or horizontal.
Cooling	Naturally air cooled or forced air colling.
Electrical	
Life expectancy	<i>Gas filled:</i> up to 180 000 h at temperature class -40/D and up to 160 000 h at temperature class -40/60. <i>Resin filled:</i> up to 200 000 h at temperature class -40/D and up to 180 000 h at temperature class -40/60. This reduces cost for maintenance and replacement.
Inrush current withstandability	Up to $500 \cdot I_r$ ensures best performance of the device. The higher the capability, the less stress is put on the capacitor by harmful high inrush and over current.
Number of switching operations	Max. 15 000 p.a.
Voltage	230 ... 690 V AC
Output	5 ... 33 kvar
Frequency	50/60 Hz
Safety	
Self-healing	In case of a punctual overload an automatic reparation of the affected area is performed. During this process the capacitor remains fully functionally. Capacitance losses are in negligible range.
Overpressure disconnecter	All three phases will be disconnected in case of overpressure inside the capacitor or at the end of the useful life.
Impregnation	Two types of impregnation agents: B25674A* - dry type gas filled B25675A* - semi-dry biodegradable soft resin; non PCB
Terminals	Optimized safety terminal, touch proof IP20. Provided with ceramic discharge module or discharge module block. Terminal types for cross section 16 mm ² or 25 mm ² and max. torque 1.2 or 2 Nm.
Approvals	
	IEC 60831-1/2 Edition 3.0 (2014) – Certificate available
	UL 810-5th edition – Certificate in process
	IS 13340-1/2 (1993, 2012)
	IEC 60831-1/2 Edition 3.0 (2014) – Certificate in process
Product range	
Ordering codes/types	B25674* – gas filled B25675* – resin filled

PhaseCap Energy Series

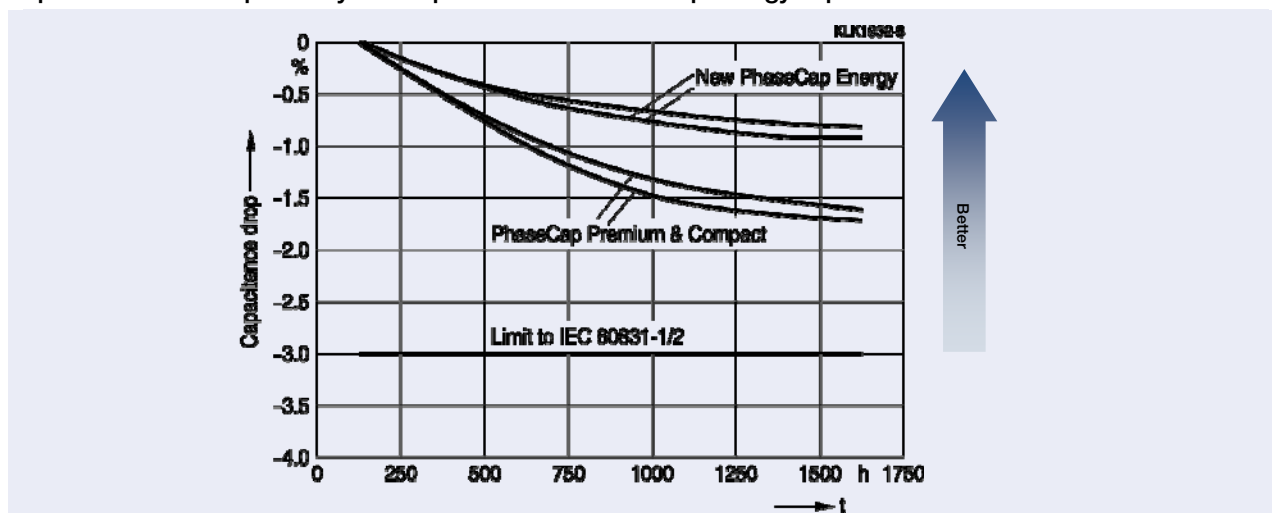

Overpressure disconnecter

The overpressure disconnecter will be activated in case of overpressure in the can or at end of useful service life. The wires of all three phases will be separated and the capacitor is completely disconnected from the line.

Principle of 2- and 3-phase safety functions of PFC capacitors

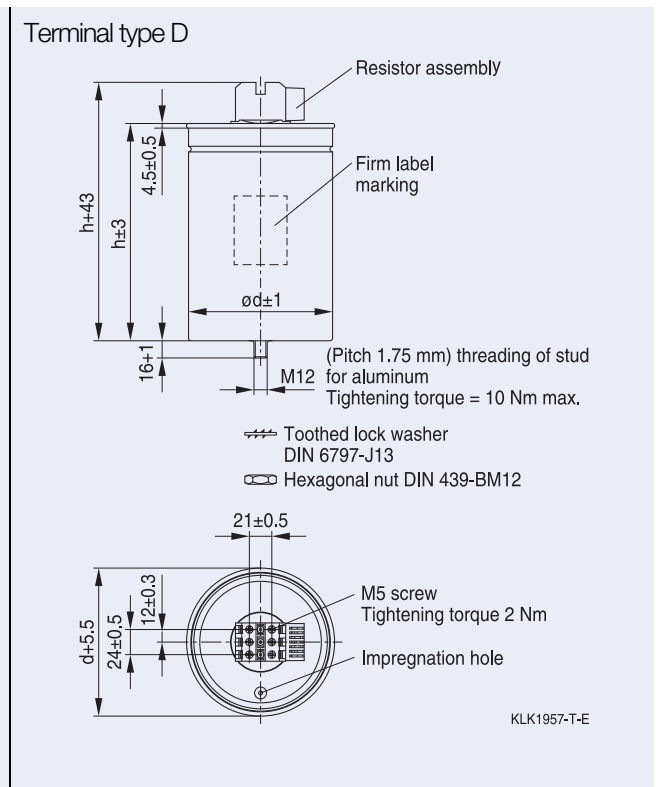

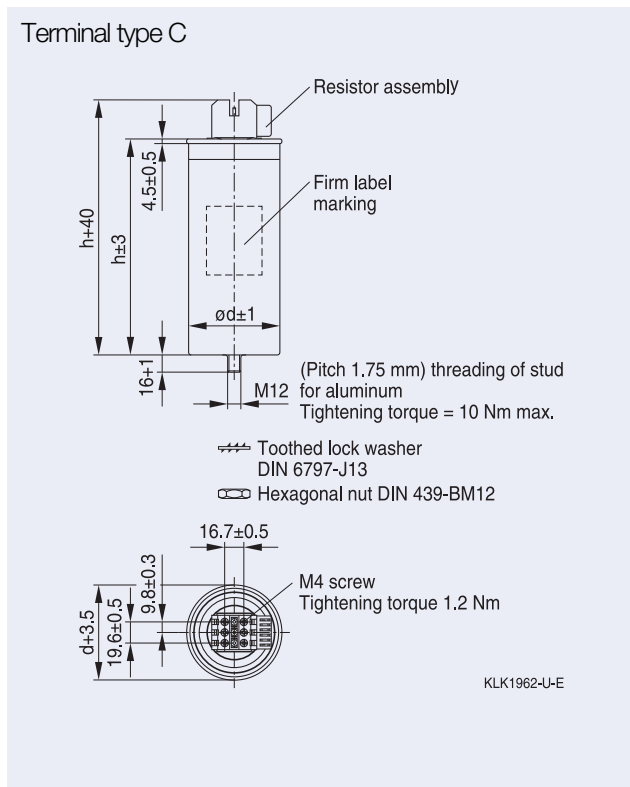

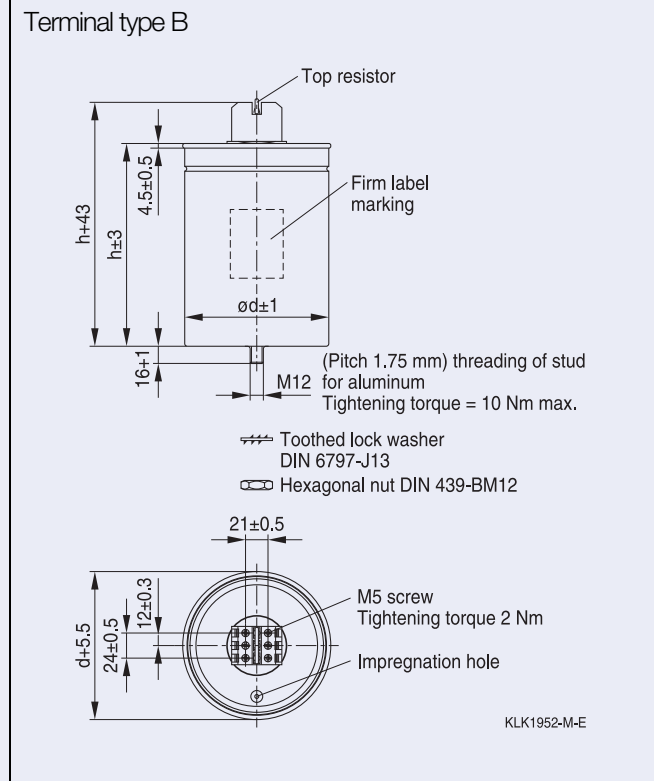

Improved life time expectancy and capacitance for PhaseCap Energy capacitors

Display of ordering codes for EPCOS products

The ordering code for one and the same EPCOS product can be represented differently in data sheets, data books, other publications, on the EPCOS website, or in order-related documents such as shipping notes, order confirmations and product labels. **The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products.** Detailed information can be found on the Internet under www.epcos.com/orderingcodes

Important information: Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products. We expressly point out that these statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. It is incumbent on the customer to check and decide whether a product is suitable for use in a particular application. This publication is only a brief product survey which may be changed from time to time. Our products are described in detail in our data sheets. The Important notes (www.epcos.com/ImportantNotes) and the product-specific Cautions and warnings must be observed. All relevant information is available through our sales offices.
